

MORNING ROUTINE CHECKLIST

Hi friend!

Thank you for downloading this morning routine resource. It is an amazing way to start guiding even your littlest learner towards becoming more independent in your household.

Each page is scaffolded towards a specific age group and ability level of independence. I recommend laminating the morning routine chart and having it in your child's bedroom, or near their homeschool learning space so that they can go through the checklist each morning when beginning to establish the routine.

As you start this new journey, make sure to check in with your child after morning basket work to ensure they have completed all of their tasks!

Head over to my **Amazon Storefront** for an amazing laminator, and dry erase markers to pair with this chart.

Looking for basket work? Search no more! With love From, Homebuilt has all the morning basket essentials with the basic bundle line, and a monthly themed bundle. Go to the "**Shop**" section of Homebuilteducation.com to get the bundle that's just right for your child.

Xoxo,

Mandy
